ABSTRACT

Halal certification is a halal recognition by MUI on a product that is important especially for Muslim consumers. The existence of a halal label on a product provides added value to businessmen while consumers getting a consumer guarantee. Based on The Republic of Indonesia Law No. 33 of 2014 regarding the guarantee of halal products, the provisions of halal products are based on ingredients and processing. This study focuses on the halal production process based on Islamic Shari’a. This study aimed to identify the factors influencing consumer interest in halal food products. The results showed that halal certification, halal awareness, food ingredients affect purchase intention. These three factors may become consideration for the producer to produce their product.

Keywords: halal, Pontianak towards a halal city.

1. Introduction

The city of Pontianak has the characteristics of a heterogeneous society consisting of 3 ethnic groups namely TIDAYU (Tionghoa, Dayak and Malay). Based on population statistics of West Kalimantan Province, the population of non-Muslims in West Kalimantan was recorded as 2/3 of the Muslim population as many as 3,206,084 people. The people of Pontianak City, in particular, have behaviors/habits to eat outside for habitual reasons or just want to try tasting new culinary delights.

According to data from the Central Statistics Agency (BPS) since 2015, in the city of Pontianak, the developments in the trade, hotel, and restaurant sectors continue. The types of culinary in Pontianak City are more diverse, which make competition in this business more creative. In terms of taste and aesthetics to the consumer's guarantee become the attention of business owners. Competition in terms of taste and aesthetics is the creativity demanded by each food business owners; however, the issue of consumer's guarantee is actually related to the halal certification in the products produced.

The Muslim community of Pontianak City, they should be careful in choosing the desired location/type of food they intend to eat as it is an obligation for a Muslim to eat halal food. The presence of a halal logo on the products issued by MUI makes it is easier and sure for Muslim communities in choosing halal products. The halal logo on products guarantees legal protection for Muslim consumers in Indonesia. This has been stated in Law No. 33 of 2014 related to the guarantee of halal products.

However, most IKMs have not yet got the halal certification on their products. Therefore, this study aimed to identify the factors influencing consumer interest in halal food products as well as provide knowledge on development strategies and increase business value by having a halal logo as an added-value product.

2. Materials and Methods

The blue ocean strategy is characterized by unexplored market space, demand creation, and very profitable growth opportunities. (Kim, 2005). The blue ocean strategy is a strategy that focuses on growing demand by creating new market spaces that have not been explored by competitors. In this case, the added value which becomes the main focus is the halal logo on the product. IKM products that have the MUI halal logo will become the main attraction to increase sales value.
3. Result and Discussion

Results of 2 Variables Analysis

The results of the descriptive analysis of the halal certification variables show in the table below:

<table>
<thead>
<tr>
<th>Category</th>
<th>Internal Score</th>
<th>Frequency</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>x&gt;= 63,988</td>
<td>44</td>
<td>20.5%</td>
</tr>
<tr>
<td>Moderate</td>
<td>52,161&gt;x&gt;= 63,987</td>
<td>135</td>
<td>62.8%</td>
</tr>
<tr>
<td>Low</td>
<td>52,161&gt;X</td>
<td>36</td>
<td>16.7%</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>215</td>
<td>100%</td>
</tr>
</tbody>
</table>

Based on the table, it can be concluded that some respondents only use halal certification to choose halal food. While the results of purchase intention variables analysis are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Internal Score</th>
<th>Frequency</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>X&gt;=34.068</td>
<td>38</td>
<td>17.7%</td>
</tr>
<tr>
<td>Moderate</td>
<td>28.741&gt;X&gt;=34.068</td>
<td>135</td>
<td>62.8%</td>
</tr>
<tr>
<td>Low</td>
<td>28.741&gt;X</td>
<td>42</td>
<td>19.5%</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>215</td>
<td>100.00%</td>
</tr>
</tbody>
</table>

The result of the analysis of purchase intention showed that out of 215 respondents, there were as many as 135 people (62.8%) have moderate purchase intention, 42 people (19.5%) were on the low category, and a total of 38 people (17.7%) have high purchase intention. This is suggesting that some respondents have sufficient interest to buy halal food products.

Hypothesis Testing

In this study, it hypothesized that there is a positive effect of halal certification, halal awareness and food ingredients towards purchase intention. Multiple regression analysis was conducted using SPSS 20 to analyze the result.

<table>
<thead>
<tr>
<th>Variable</th>
<th>Coeff. (B)</th>
<th>t-value</th>
<th>Sig.</th>
<th>Conclusion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Halal Certification</td>
<td>0.106</td>
<td>3.654</td>
<td>0.000</td>
<td>Significant</td>
</tr>
<tr>
<td>Halal Awareness</td>
<td>0.251</td>
<td>3.994</td>
<td>0.000</td>
<td>Significant</td>
</tr>
<tr>
<td>Food Ingredients</td>
<td>0.191</td>
<td>2.555</td>
<td>0.011</td>
<td>Significant</td>
</tr>
</tbody>
</table>

Constanta = 13,467
Adjusted R2 = 0,288
F Value = 29,835
Significance = 0.000
The results showed that the fourth hypothesis, namely halal certification, halal awareness, and material composition, as well as the three variables jointly affecting purchase intention are statistically acceptable.

<table>
<thead>
<tr>
<th>No</th>
<th>Hypothesis</th>
<th>Verification</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Halal certification has a positive and significant effect on purchase intention</td>
<td>Accepted</td>
</tr>
<tr>
<td>2</td>
<td>Halal awareness has a positive and significant effect on purchase intention</td>
<td>Accepted</td>
</tr>
<tr>
<td>3</td>
<td>Food ingredients has a positive and significant effect on purchase intention</td>
<td>Accepted</td>
</tr>
<tr>
<td>4</td>
<td>Halal certification, halal awareness, food ingredients have positive and significant effect on purchase intention</td>
<td>Accepted</td>
</tr>
</tbody>
</table>

4. Conclusion

Halal certification, halal awareness, food ingredients affect purchase intention by 28.8%. While the remaining 71.2% is influenced by other factors that were not examined by the researcher. The result showed that all variables affect the purchase intention of consumers. It means that halal certification, halal awareness, and food ingredients may cause the consumer's buying intention high in halal food products.

The suggestion is the producer of the food product should consider the three factors namely halal certification, halal awareness, and food ingredients on the product as nowadays Muslims are consumers which become potential markets for halal food products.
